

OSSINING PUBLIC LIBRARY PRESENTS

EVERY DAY'S A HOLIDAY

INTERNATIONAL TIGER DAY: JULY 29

Did you know?

- Tigers are the largest species of cats in the world.
- An adult Siberian tiger can weigh up to 660 pounds.
- It's not just a tiger's fur that is striped--their skin is striped as well.
- No two tigers have the same stripes; they are all different, like our fingerprints.
- A tiger's average lifespan is 10-15 years, but tigers have been known to live up to 26 in the wild.
- Tiger moms take care of their cubs until they are two years old.
- Unlike most cats, tigers seem to like the water and are good swimmers.
- A tiger's roar can be heard up to two miles away.

How to celebrate

- See tigers at the zoo. The Bronx Zoo is reopening to the public on July 24. You must purchase tickets in advance and follow all social distancing procedures. Click [here](#) for more information about visiting the Bronx Zoo.
- Check out the these tiger cams at the [San Diego Zoo](#), the [Indianapolis Zoo](#), or the [Milwaukee Zoo](#).
- Make a tiger craft.
 - [Wonderful DIY](#)
 - [Craftulate](#)
 - [Red Ted Art](#)
