Work Session

- HVAC Update – Jim Dolan of OLA participated via phone:
  o State approval needed – paperwork and drawings to be submitted
  o SED need to give the green light (mid-March approximately)
  o Out to bid (April-May approximately)
  o Construction (hope to be done by Sept. 15 – ready to be checked out)
  o Any significant changes? Clarified thermostats with John Tortoso
  o The work that is included in this plan will significantly improve the heating system by introducing the gas-fired boiler. That will reduce the load on the well water by extracting less heat from it, and should improve the overall performance. Additionally, the balancing being done as part of the project should improve comfort in the building, as well as the efficiency of the system.
  o Still have roof-top unit option to help with cooling
  o When manual adjustments are needed contractor that puts in the system can still help
  o Operations & Maintenance manuals will be left onsite including who to contact when problems arise.

- Wall Update
We should receive a report within a week or so from Antonucci. The monthly measurements of the retaining wall by the surveyors has shown a minor variation which is not thought to be worrisome. The data has been provided to Antonucci for review.
