

USE YOUR BRAIN

CAN YOU FIGURE OUT THE NAMES OF THESE MIXED UP MOVIES?

The Challenge

Below are the titles of some popular movies. Unfortunately their titles have become twisted!

In the first group, most of the words in the title have been replaced by synonyms, or words that mean the same thing. In the second group, most of the words in the title have been replaced by antonyms. An antonym is a word whose meaning is the opposite of another word. Hot/Cold, Small/Big, and Dark/Light are antonyms. Some words that don't have an antonym are instead replaced by a word that means something that is related, but completely different, such as shack/skyscraper.

Try to figure out the original titles in this linguistic challenge!

Synonyms
