

THE OSSINING PUBLIC LIBRARY
AND THE PEEKSKILL-FIELD PUBLIC LIBRARY
PRESENT A VIRTUAL PROGRAM

THE SCIENCE OF ASTRO-METEOROLOGY

Wednesday, March 3rd at 7 p.m.

For ages man has attempted to make sense of the changing aspects of the Sun, Moon and their possible influence on our ever-changing weather. Can a lack of sunspots ultimately lead to a trend toward colder temperatures? Can the changing phases of the Moon and its distance from Earth lead to stormy periods? Or do the movements of the planets have any control over our climate and weather? Can we really put any credence in the forecasts that are issued annually by such publications as the Old Farmer's Almanac or by other so-called long-range weather experts? The answers may surprise you! This talk will be presented by Joe Rao, eight-time Emmy nominated meteorologist and science reporter from 1995 to 2016 for News 12 Westchester.

Registration is required. Please register [here](#) on our online calendar and the zoom link will be sent on the day of the program.

If you have any questions, please contact James Trapasso at 914-941-2416 ext. 327 or jtrapasso@wlsmail.org
