

Why are parking spaces blocked off in the Ossining Public Library's lot?

We have blocked off the lower parking spaces along the retaining wall out of an abundance of caution. We are working with an engineering firm and surveyors to collect data and assess the condition of the wall. We want to ensure that we are maintaining our parking lot and wall properly and that it will be able to serve us well over the life of our building.

We realize that our parking lot becomes full on a regular basis, especially as usage of our library picks up. We also understand that use of the library lot by folks who are not using the library is contributing to the problem and we are looking at possible solutions. We apologize for the daily inconvenience that this causes our patrons and ask for your understanding as we work towards a resolution. If you would like additional information, please contact the Library Director at kfels@ossininglibrary.org.
